PROJECTS

SahiBhaav | Frontend and API Integration | Smart India Hackathon 2026, Team Dynamic

- Contributed frontend UI and API integration to a team project connecting farmers directly with verified buyers.
- The platform features live Agmarknet mandi prices and AI-predicted pricing; project stack includes React, Tailwind CSS, FastAPI, and PostgreSQL.

Project: farmer-produce-marketplace.vercel.app | Code: github.com/ayushichaudhary2045/farmer_produce_marketplace

VeriProxy-AI | Independent Project | Geeks2Code Hackathon, Wayzyy Track

- Built an AI and computer-vision prototype for remote interviews and online testing that analyzes camera feed and produces a live integrity/risk score.
- Led the project end to end independently using Next.js and computer-vision/AI components.

Project: veri-proxy-ai.vercel.app | Code: github.com/ayushichaudhary2045/VeriProxy-AI

Zomato Clone | Independent Frontend Project

- Built a responsive food-delivery interface clone with HTML, CSS, and JavaScript, focusing on layout and UI replication.
